REPORT CONTENTS

- Methodology and boundaries
- Company overview
- Baseline emissions report;
 - Scope breakdown
 - Intensity Metrics
 - Energy & Fuels
 - Business travel
 - Employee Commuting
 - Other Scope 3
- Assessors statement and comments

DISCLAIMER

This report has been prepared for the Global City Futures Ltd. We have taken all reasonable care to ensure that the facts stated herein are true and accurate in all material aspects. No liability of any kind is assumed by Carbon Sense Ltd. or any of its directors, officers, employees, advisors or agents about any such opinions, projections, assumptions or any other information contained in, or otherwise concerning this report.

METHODOLOGY & BOUNDARIES

QUANTIFICATION & REPORTING METHODOLOGY

Carbon emissions are calculated using the UK Government published carbon conversion factors relevant to the reporting period. Our carbon reduction plans follow the Public Procurement Notice (PPN 06/21) guidance, and where possible, additional criteria and narrative is included tailored to each organisation.

ORGANISATIONAL BOUNDARY

Global City Futures Ltd. has no subsidiaries nor parent companies to be concerned with, so the organisational boundary is defined solely as **Global City Futures Ltd.**

Operational Control Methodology has been applied, meaning we endeavour to include all emissions over which **Global City Futures Ltd.** has Operational Control.

For the purposes of this Carbon Footprint, we are including Scope 1, Scope 2, and all Scope 3 with enhanced focus on purchased goods and services.

OPERATIONAL SCOPES

Emissions from Scope 1 and 2 have been measured, including ALL Scope 3 Upstream and Downstream categories

STANDARD AND METHODOLOGY USED

Greenhouse Gas (GHG) Emissions are classified as Scope 1, 2 or 3 as referred to in the Greenhouse Gas Protocol. Emissions have been calculated using the data provided by the reporting company, which includes an average per person conversion factor used based on shared office space.

Emissions were calculated using various published conversion factors, as evidenced and outlined in the data collection template. As more accurate data is received, it is recommended to continuously and/or annually review this process.

DATA QUALITY / CONFIDENCE

The data used to generate this report has been collected from various sources from within the company. Data has been converted to CO₂e using published GHG conversion factors and spend-based methodology from various sources where purchase values data is only available

COMPANY OVERVIEW

Reporting Period:	January 2024 – December 2024
Industry	Other business support service activities not elsewhere classified
No. of staff	12
No. of sites - Owned	0
No. of sites - Leased	1
No. of Company Vehicles - Owned	0
No. of Company Vehicles - Leased	1

Global City Futures Ltd. is a financial consulting firm and Private Limited Company (Company No. 10769046) with a registered address of: Global City Futures Ltd. The Mount, 72 Paris Street, Exeter, EX1 2JY.

Global City Futures Ltd. partners with businesses, local authorities, and public sector institutional leaders. We co-create lasting solutions with projects for positive change, for local and global environments, for the next generation..

REPORTING PERIOD: JANUARY 2024 – DECEMBER 2024

Emissions Reporting: 2024

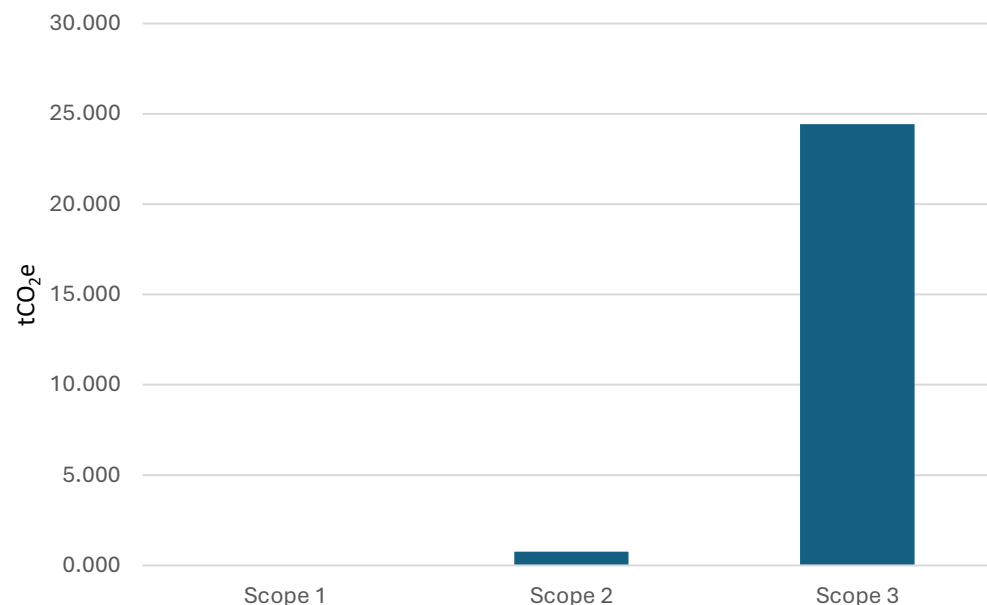

(Baseline year emissions 2024: 25.195 tCO₂e)

Emissions	TOTAL (tCO ₂ e)
Scope 1	0.000
Scope 2	0.767
Scope 3	24.428
Total Emissions	25.195 tCO₂e

Collectively, both Scope 1 (direct fuel use) and Scope 2 (purchased electricity) represent 3% of total emissions.

Indirect carbon emissions in Scope 3 comprise the majority of emissions, representing 97% of total emissions. This means that upstream and downstream value chains are the greatest source of company emissions.

Emissions Breakdown By Scope

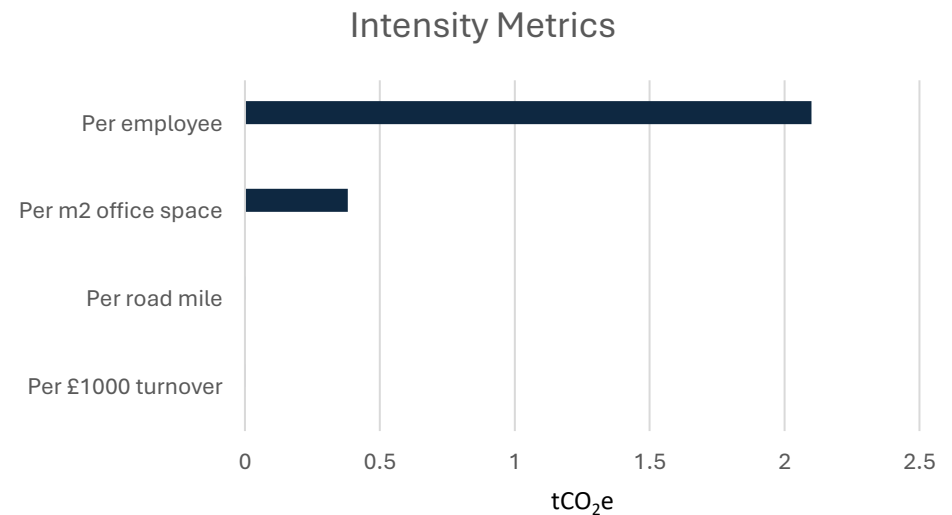

CARBON EMISSIONS - INTENSITY METRICS

Per Employee	2.100 tCO ₂ e
Per m ² office space	0.381 tCO ₂ e
Per road mile	0.002 tCO ₂ e
Per £1000 turnover	0.00003 tCO ₂ e

Intensity metrics are used to express the carbon emissions or greenhouse gas emissions of a company or organisation in relation to a specific unit of output or activity. These metrics help assess the environmental efficiency of the company's operations and can be used to track progress toward emission reduction goals.

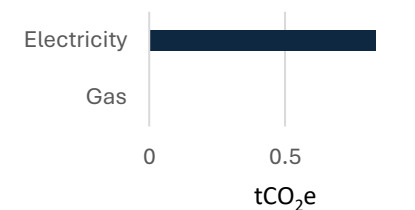

CARBON EMISSIONS

ENERGY & FUELS

Emissions that come from sources the company owns or controls including fuels burned for heating, power , factory emissions, electricity, steam and cooling.

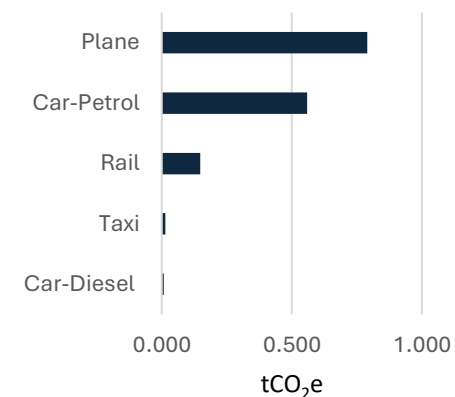

Electricity (Location based)	0.8333 tCO ₂ e
Gas	0.000 tCO ₂ e
Total	0.8333 tCO₂e

BUSINESS TRAVEL

Emissions from employee flights, hotels, and transport for activities related to work.

Plane	0.790 tCO ₂ e
Car-Petrol	0.559 tCO ₂ e
Rail	0.147 tCO ₂ e
Taxi	0.014 tCO ₂ e
Car-Diesel	0.008 tCO ₂ e
Total	1.518 tCO₂e

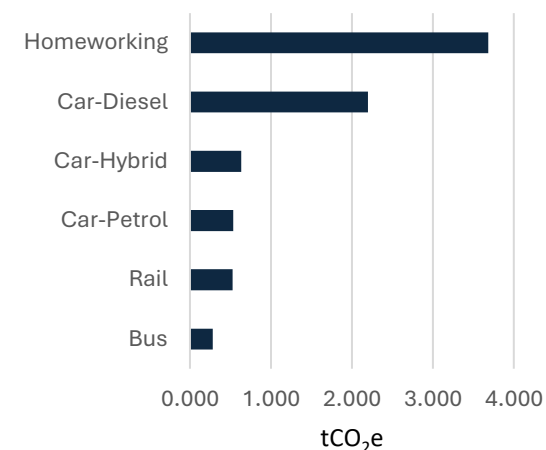

CARBON EMISSIONS

EMPLOYEE COMMUTING

Emissions from employee travel to and from work

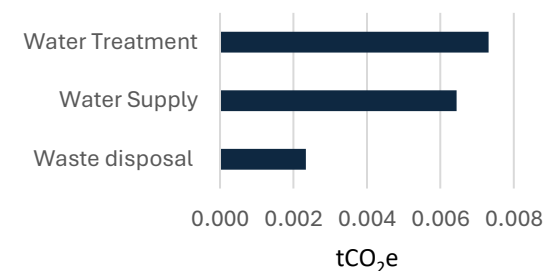

Homeworking	3.685 tCO ₂ e
Car-Diesel	2.200 tCO ₂ e
Car-Hybrid	0.634 tCO ₂ e
Car-Petrol	0.534 tCO ₂ e
Rail	0.529 tCO ₂ e
Bus	0.282tCO ₂ e
Total	7.864 tCO₂e

OTHER RECORDED EMISSIONS

Emissions from other areas of the operation where data exists or were feasible to measure

Water Treatment	0.007 tCO ₂ e
Water Supply	0.006 tCO ₂ e
Waste Disposal	0.002 tCO ₂ e
Total	0.016 tCO₂e

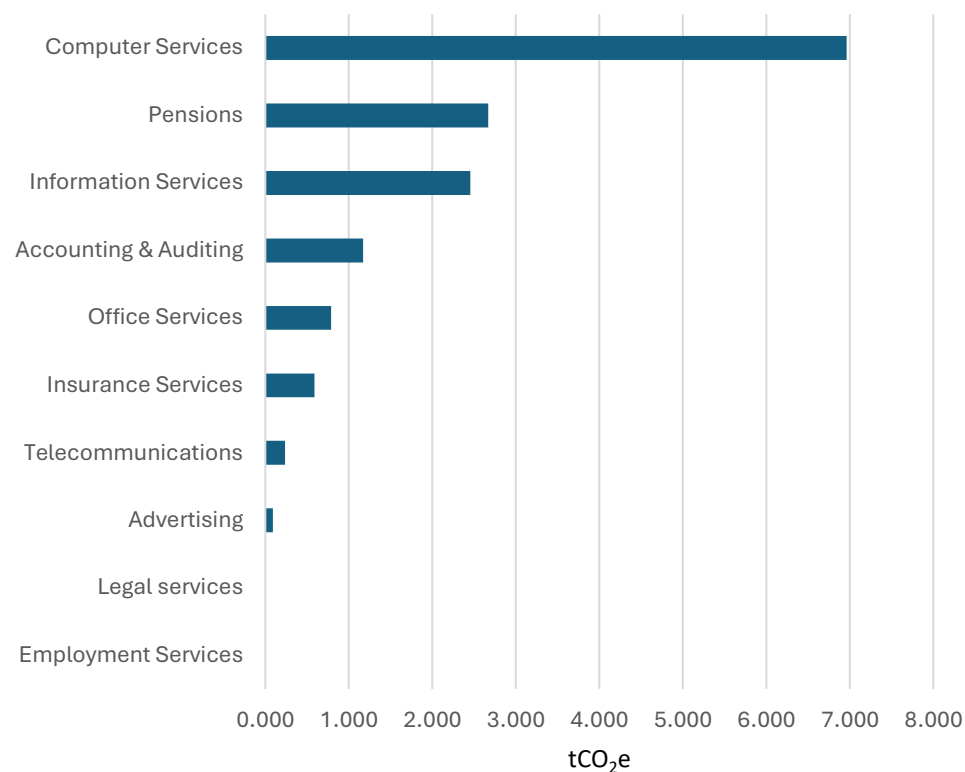

CARBON EMISSIONS

PURCHASED GOODS & SERVICES

Indirect emissions that occur when a company buys goods and services. These emissions are part of a company's value chain and are not directly controlled by the company

Computer Services	6.961 tCO ₂ e
Pensions	2.671 tCO ₂ e
Information Services	2.456 tCO ₂ e
Accounting and Auditing	1.171 tCO ₂ e
Office Services	0.786 tCO ₂ e
Insurance Services	0.475 tCO ₂ e
Telecommunications	0.236 tCO ₂ e
Advertising	0.091 tCO ₂ e
Legal services	0.004 tCO ₂ e
Employment Services	0.000 tCO ₂ e
Total	14.964 tCO₂e

ASSESSORS COMMENTS

Carbon Sense Ltd. has supported in the collection of the carbon emissions data for **Global City Futures Ltd.** for the period **1st January 2024 – 31st December 2024**. We have reviewed data provided and calculated emissions using activity or spend-based methodology as appropriate, quantifying these into categories as disclosed in this report.

In our opinion, **25.195 Tonnes of CO₂e** represents a good indication of carbon emissions in accordance with the operational scopes outlined in this report and GHG Protocols defined by the organisation's boundaries. A fair proportion of Scope 1 & 2 emissions is reflected in this report, including all main categories of Scope 3 emissions that have been listed which are technically feasible to measure.

Global City Futures Ltd. is committed to measuring and acting to reduce its emissions in all 3 Scopes in line with its sustainability goals and net zero targets and committing to;

- ✓ Achieve Net Zero in line with the Science Based targets set out by the UNFCCC - To achieve Net Zero no later than 2050 and target a 50% reduction in emissions by 2030
- ✓ Set realistic short- and long-term targets that are designed to achieve our Net Zero commitments
- ✓ Report the total Greenhouse Gas emissions associated with the business regularly and accurately
- ✓ Take practical steps to collect and report activity where appropriate and where concise data is available
